travel essentials

If you had to design an advert for your personality it would look like your luggage. What you choose to carry your goods and chattels away from home reveals more than you might think. Are you a battered classic, quietly showing off how many times you've travelled? Or a contemporary 'Sex and the City' Miss with a matching set in the latest colour? Will you buy a bag for life or co-ordinate anew with the style of your next destination?

Practical or pretty, muted or metallic, wildly patterned or posh plain, they're all out there in big bags and small bags, suitcases and trolleys.
